

exuus

Front End Developer, Intern

Front End Engineer, Intern

You'll learn how to be a professional developer and make yourself tons more valuable to startups, and work on cutting-edge problems that you won't see in a classroom. You'll work closely with the founders, design, engineering and product teams to implement and release product into the wild. Your code will touch thousands of people. You'll join a fast-moving team that continuously pushes code to production.

Responsibilities

- Work with Product Designers to implement the next generation of Exuus products
- Build efficient and reusable front-end abstractions and systems
- Participate in design and code reviews
- Interact with other team members to incorporate their innovations and vice versa

Requirements

- Ability to write high-performance, reusable code for UI components
- Strong experience in JS frameworks like Angularjs, React, Backbone
- (Angularjs preferred since we are currently using it)
- Keeps up to date on the changing Angular landscape, specifically, Angular 2
- Experience integrating with a JSON API
- Experience developing rich applications with HTML/CSS/JS
- Pursuing BS or MS degree in Computer Science or a related technical field

PERKS

- Lunch provided every day
- Transport Provided every day.
